

# FLOMAXX

The **FLOMAXX** was developed specifically for Shoe Presses and Highly Loaded Large Roll Presses, in the Board and Packaging Sector. The design now has also been adapted for us in the Pulp Market Sector.

The **FLOMAXX** is made of highly incompressible laminated bases engineered with a **unique** machine direction yarn that provides :

- excellent drainage
- low flow resistance
- excellent structural stability
- consistently high amounts of dewatering throughout a press felts life

Sheet finish requirements are met by an engineered single layer masking fabric, that optimizes the pressing surface while reducing hydraulic pressure.

**FLOMAXX** is another  
**VALUE ADDED SOLUTION FOR OUR CUSTOMERS**
