

## Cocked Fabrics

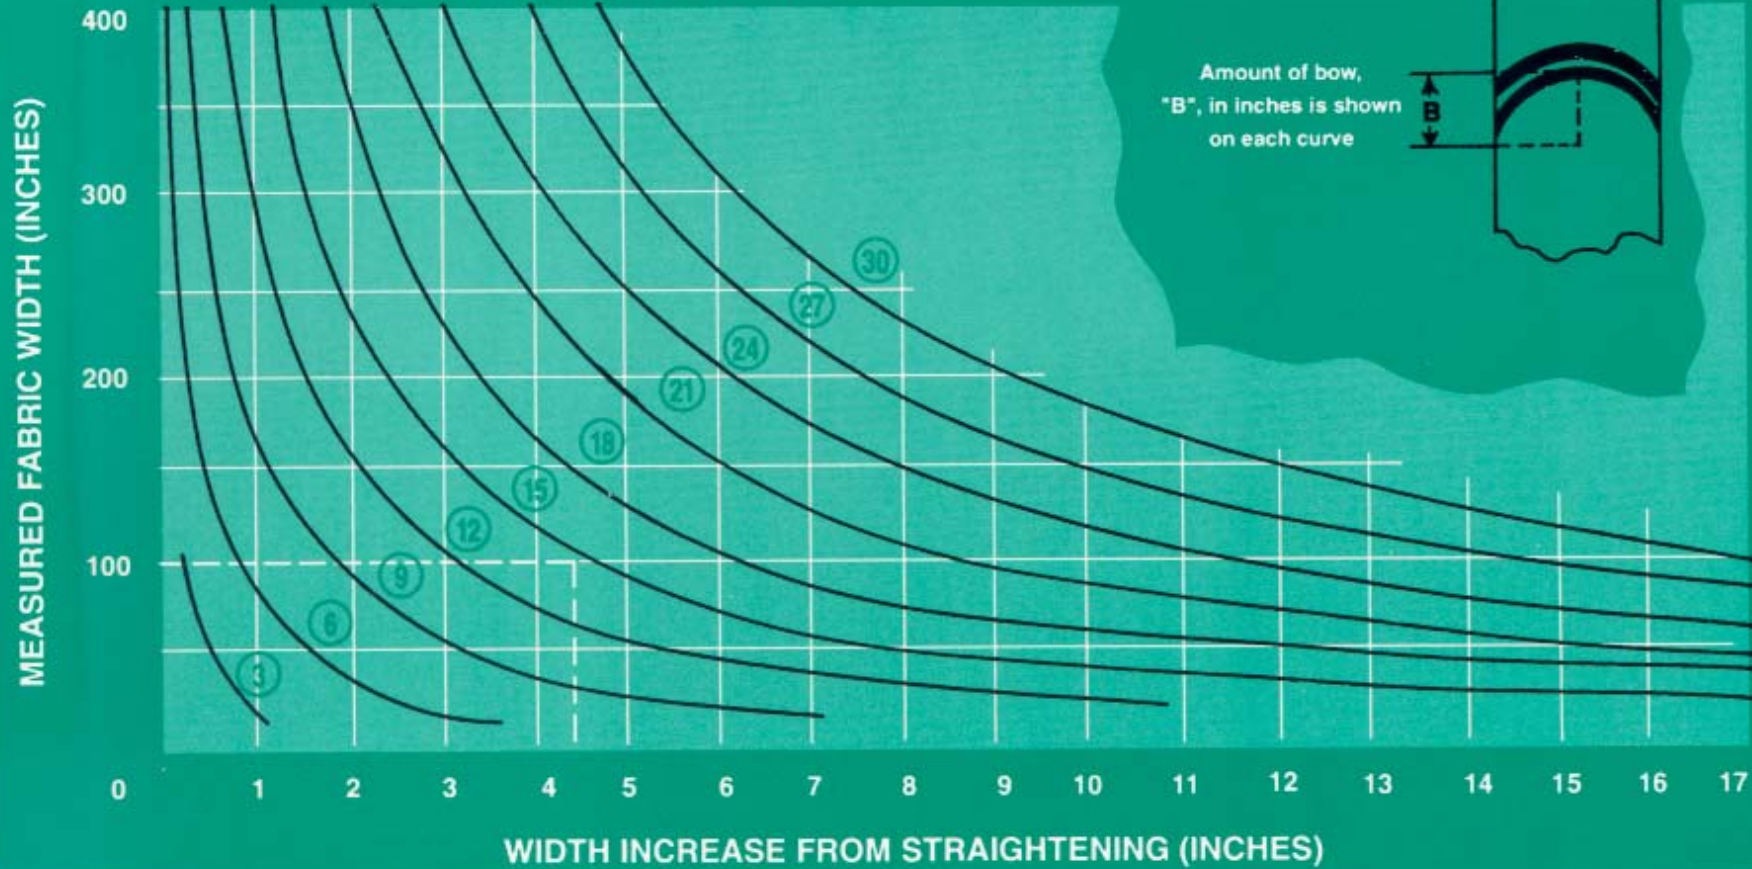

**INSTRUCTIONS:** Width increase from straightening cocked fabrics can be determined with this graph. For example: For a fabric that measures 100 inches and is cocked 24 inches, straightening of the seam will widen the fabric by 3 inches. Conversely, a width decrease resulting from cocking may also be predicted.

P.O. BOX 471  
 WAKE FOREST, N.C. 27588-1709  
 TEL.: (919) 556-7235  
 FAX: (919) 556-1063

## Bowed Fabrics

INSTRUCTIONS: Width increase from straightening bowed fabrics can be determined with this graph. For example: For a fabric that measures 100 inches and is bowed 15 inches, straightening of the seam will widen the fabric by 4.4 inches. Conversely, a width decrease resulting from bowing of a fabric may also be predicted.
